SATRA CONCENTRATES
RCRA-UNREGULATED**

Ms. Kim Ogle
U.S. EPA
RCRA Enforcement Branch
HRE 8J
77 West Jackson
Chicago, Illinois 60604

Dear Ms. Ogle:

In response to your telephone request of June 16, 1992, please find the enclosed information concerning Satra Concentrates. Please note that the water samples were collected by the Division of Water Quality Planning and Assessment on February 18, 1988. The solid samples were collected by the Division of Hazardous Waste Management on June 8, 1989. These were the only analytical data I was able to locate. Sample number 4 on the Kemron Chain-of-Custody form states that it was taken from a "K090 pile on hill". This was probably intended to mean K091. It is my understanding that K090 was listed on Satra Concentrates' Part A Application in error, and that no K090 was ever generated at this facility.

Feel free to contact me at this office if any additional questions arise.

Sincerely,

Fred J. Snell
District Representative
Division of Hazardous Waste Management
